

Node

1. Node
2. Runtime environment
3. REPL
4. Single thread vs Multithread
5. Event driven
6. TCP/IP
7. DNS
8. npm
9. NPMrc
10. package.json
11. package-lock.json
12. .npmrc
13. dependencies vs dev dependencies
14. NVM
15. .env
16. .gitignore
17. Global object
18. node.js properties
19. modules
20. fs module
21. fs.stat
22. fs-operations
23. path module & operations
24. OS module & operations
25. URL module & operations
26. util & zlib
27. HTTP
28. HTTP vs HTTPS
29. Statelessness
30. HTTP module & operations
31. components of req & res.
32. HTTP request structure
33. parts of HTTP request.
34. Identifying request method
35. use of HTTP headers
36. Status code.
37. Routing
38. Express
39. express vs httpServer
40. app.use
41. app.get
42. app.post
43. express.json()
44. express.urlencoded()
45. express.static
46. body parser
47. view engine
48. res.render
49. Partial

50. Template partials
51. Template inheritance
52. middleware
53. Types of middleware
54. Parameters in middleware
55. app.set
56. app.all
57. app.locals
58. Dynamic routing
59. Router chaining
60. Query Params
61. path params
62. req.query vs req.params
63. Body, Params, Query
64. HTTP methods
65. Put vs Patch
66. Put vs Post
67. options
68. setHeader
69. writeHead
70. Cookies
71. Sessions
72. Session vs Cookies
73. express-session
74. maxAge vs Expires
75. Cookie flags
76. Cookie vs localStorage vs Session Storage
77. Session storage vs express-session
78. browser Storage concepts.
79. browser Cache
80. Types of browser storage
81. Cookie expiry
82. Event emitter
83. Call back.
84. Error-first Callback
85. promisify
86. Concurrency vs parallelism
87. Event loop
88. How node handles concurrency
89. Concurrency without multiple workers
90. Thread pool
91. process vs threads
92. Libuv
93. Timer module
94. cluster module
95. worker Threads

96. Multithreading in node
97. why node struggles with
cpu-bound tasks
98. Authentication vs
authorization.
99. CORS
100. preflight request
101. Same origin policy
102. CSRF, XSS
103. Hashing vs encryption
104. SSL Certificate
105. JWT
106. Passport authentication
107. Rate Limiting
108. Buffer
109. Stream
110. Transform stream
111. Piping
112. Child process
113. fork
114. spawn
115. exec, execfile
116. Exit codes
117. Content negotiation
118. express.noCache()

119. API versioning.
120. REST API & principles
121. REST vs web API
122. Scaffolding
123. MVC architecture
124. models, views, controller
125. Morgan & muler
126. Reactor pattern
127. Common JS vs ESM
128. How env values
stored / accessed
129. websockets
130. webhooks
131. ODM (Object Data
mapper)
132. Load balancing
133. Rate Limiting
134. reverse proxy
135. Crypto module
136. cron-job
137. Token introspection
138. Cache API
139. Bundlers
140. secure workers
141. User Agent
142. Socket
143. fs.local
